Bay-Waveland Garden Club Christmas Lighting Contest Winners Announced

SPECIAL PRIZE AWARDED LEROY LUKE FOR RELIGIOUS ORIGINALITY

The Bay-Waveland Garden Club announces the following prize winners in the Christmas Lighting Contest held December 28th. All entries were judged by a committee of Garden Club members.

Winners were as follows: Grand prize for best overall entry: Mrs. Joseph Colson, 502 Beach Blvd., Waveland; Doorways: Mrs. J. L. Bishop, 322 de Montluzin, Windows: Miss Veronica Mohr, 135 de Montluzin, Porch Tree: Mrs. W. J. Turner, de Montluzin, Living Tree: Mrs. Charles Breath, 616 Beach Blvd. A special prize was initiated this year after the judging had been completed. Because of the originality and beauty of the entry of Mr. and Mrs. Leroy Luke of St. John St., it was decided by the judges that a special award be given this entry under the heading of the Most Original Religious. Mr. Luke arranged his lights in the form of a Rosary and Cross.

To Present Comedy, Jan. 4

On Wednesday evening, January 4th at 8 p. m., the Senior Girl Scout Troop No. 1 will present a one-act comedy at the Bay St. Louis Little Theatre on Boardman Avenue. The play is called "Marko Goes A-courtin'" and it is one of the collection of amusing plays written especially for teen-age production.

The cast includes: Byanard Chamberlain, Linda Sharp, Judy Heltzmann, Martha Carr, Martha Allison and Patsy Rosatta. It is directed by Mrs. E. C. Samuel and Philip Allison has done the set. Mrs. Paul Miller and Mrs. Edward Helzmann, Jr. are in charge of props and costumes.

The Girl Scouts are producing this play to raise funds for their current activities. Admission is twenty-five cents for adults and fifteen cents for children. They have worked very hard, sacrificing a good part of their Christmas holidays, and they hope that the public will turn out to enjoy the fruits of their labor.

St. Clare's Society Plans Parish House

St. Clare's Holy Name Society for the coming year is the Parish Hall. This hall is to be 60 feet by 40 feet of concrete block construction on a concrete slab base. It will be located at the rear and to the right of the pastor's house on the church lot.

This structure is to cost approximately \$10,000. The purpose of the parish hall is to supply a meeting place for church organizations, to promote wholesome supervised entertainment for the pre-teen and teen-age youngsters of St. Clare's Parish and their friends. A senior Boy Scout Troop has been organized. It is being chartered as Troop No. 210, with future plans for Girl Scouts, Brownies and Cub Scouts. A young girls society will also be formed. Dances, roller skating and other parties and entertainment are planned upon the completion of this parish project, for the benefit of the entire community, both of the parishioners and all people of Waveland, Clermont Harbor and the summer visitors from New Orleans.

Approximately \$4,000.00 has been raised and pledged at this time. The major portion of the land clearing has been done and a driveway has been built. The basic planning and start of this operation was begun in October of this year and it is the desire of the Holy Name Society to complete the project by early spring so that full use by the teenagers will be possible by next summer.

Troop No. 6 Holds Investiture

Brownie Troop No. 6 with Mrs. Marion Beal as leader and Mrs. Jean Monti as assistant leader held their investiture ceremony preceding the Christmas holidays. Nineteen members received Brownie pins as their mothers watched proudly. Monsignor McCarthy was present.

Special Election Date To Be Set

Mayor John A. Scafile announced today that the date for the Special Election to fill the unexpired term of Commissioner Sylvan J. Ladner, Sheriff of Hancock County would be decided upon in one of the two January meetings of the Commission Council.

Mayor Scafile stated that the decision of the council will be announced in the local newspapers at a later date.

Ladner Resigns To Assume Duties As Sheriff

Sylvan J. Ladner, today officially submitted his resignation as Commissioner of the City of Bay St. Louis to the commission council in order that he may accept the office of Sheriff of Hancock County.

His letter of resignation reads as follows:

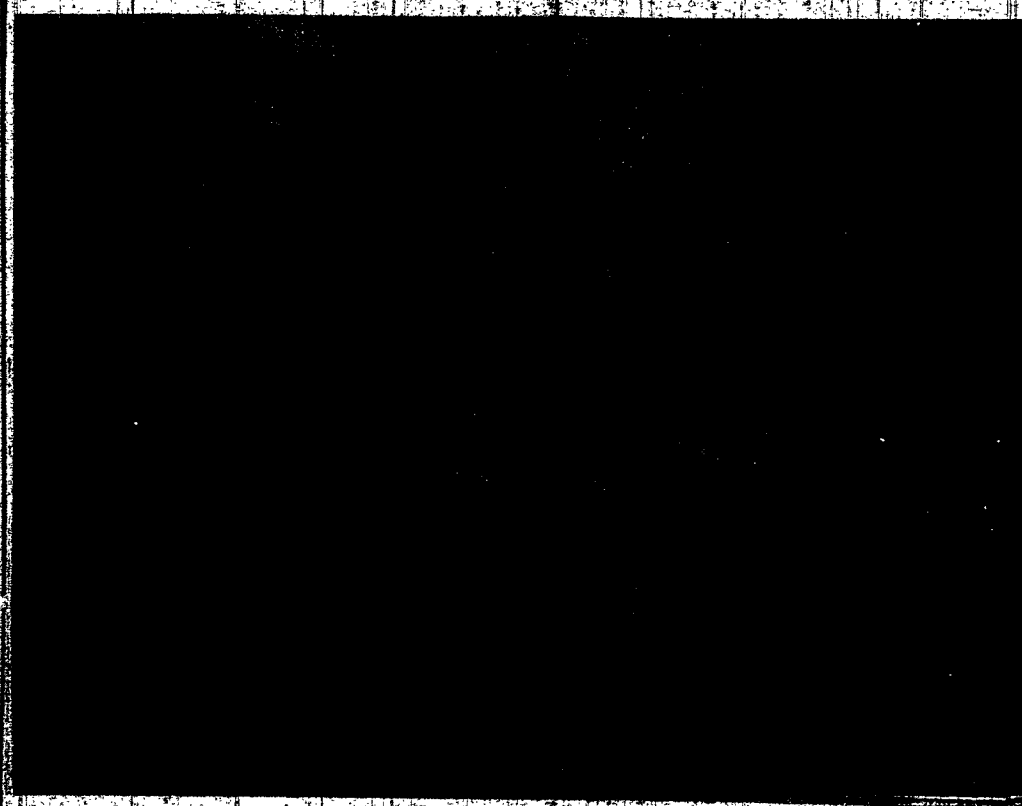

December 23rd, 1955
Hon. John A. Scafile,
Hon. J. Cyril Glover,
Members of the Commission Council
City of Bay St. Louis,
Bay Saint Louis, Miss.
Gentlemen:

I wish to take this opportunity to tender my resignation as a Commissioner of the Council of the City of Bay St. Louis effective December 31st, 1955 due to the fact that I take office as Sheriff and Tax Collector of Hancock County on January 2nd, 1956.

I have enjoyed my relations with you gentlemen during the seven years I have served as one of the City Commissioners.

I want to thank the people of Bay St. Louis for the honor of electing me as one of their Commissioners for two consecutive terms, also I want to state to the members of the Commission Council and the citizens of Bay Saint Louis that at any time in the future I can be of service to them, I want them to feel free to call on me.

Sincerely yours,
Sylvan J. Ladner, Jr.

Pictured above is the site of the proposed new St. Clare's Parish Hall.

Yacht Club In Sugar Bowl Races

The Bay-Waveland Yacht Club will be represented in the Sugar Bowl Race of Champions, which is being held at the Southern Yacht Club in New Orleans, through January 2nd.

The crew of the local club will be skippered by J. J. McDonald, past Bay-Waveland Lightning Fleet Champ. Other members of the crew will be Don Chamberlain, Sr., Captain of the Bay St. Louis Penguin Fleet and C. C. McDonald, Jr., 5 times member of the Bay-Waveland Lipton Cup Team.

Legion Kicks-Off 1956 Polio Drive

American Legion Auxiliary President, Mrs. Joe Compretta, announced today that the ladies of Auxiliary Unit No. 133 would be on the street corners along Post No. 139 all day Saturday, Jan. 7 selling Blue Crutches for the March of Dimes.

"We mothers, wives and daughters of Legionnaires also realize that Polio isn't licked yet," Mrs. Compretta stated, "and we want to do our part along with the Legion in helping to kick off the March of Dimes drive this year."

The ladies of the Auxiliary will donate their time to selling miniature Blue Crutches on opening day of the March of Dimes drive January 7.

"We know that everyone in our community will want to wear a Blue Crutch to show that they are a part of this great fight against Polio," Mrs. Compretta concluded.

Hi-way Financing To Be Legislative Problem For 1956

When the new legislature takes office in January, it will face multiple problems of varying magnitude, none of which will be any knottier than that of highway financing.

During the past fiscal year the gasoline tax (7c per gallon) produced \$38.8 million.

Of this total \$12.8 million was prorated to the county boards of supervisors \$1.9 million was refunded to non-highway users; \$792,000 went to the coast counties for seawall protection; \$913,000 went to the motor vehicle commission for operating costs; and \$4.4 million was used to pay debt service on outstanding highway bonds. These bonds incidentally, now total \$70 million to be repaid (plus \$20 million in interest) by 1975.

This left the highway department with \$7.7 million for new construction (designated by law) and \$10 million for maintenance, betterment, and overhead expense.

Next year and for succeeding years, an additional million dollars will be subtracted from highway department's share and given to the municipalities.

This leaves the highway commission faced with mounting costs of maintenance and construction; with additional mileage to the estate system which the legislature invariably transfers from county systems; with the probability of a substantial increase in the amount required annually to match federal aid.

Sea Coast Echo Changes Date Of Publication

The management of the Sea Coast Echo today announced the change of date of the newspaper from Thursday to Friday.

Since its inception, until recently, the paper was published under a Friday dateline.

During the past two years, while the Echo was owned and operated by the Bay Publishing Corporation, it was dated on Thursday.

The date of publication has been moved back to Friday in order to give our advertisers enough time to make the deadline set forth below:

Legal, Classified and Display Advertising—Wednesday, 2:00 P. M.

Cuevas No. 1 Produces 264 Barrels Per Day; Not Yet Classified By G & O Board

Selects Deputies For Forthcoming Term Of Office

Sylvan J. Ladner, Sheriff-elect of Hancock County today announced his selection of deputies for the forthcoming term.

They are as follows: M. A. Parillo, Chief Office Deputy; Sylvester Moran, Office; James Necaise, Outside Deputy; Earl Ladner of Beat 4; Clifton Dedeaux, Beat 3; Jeff Whitfield, Beat 2; Leland L. Lee, Beat 5; Raoul Teliard, Beat 5 and Lathan Garriga, Beat 5.

Ladner further stated that the selection of an outside deputy for Beat 1, an office clerk, and a night jailer have not as yet been made.

It was learned today from the Associated Press in Jackson, Miss., that the Marshall R. Young Company of Fort Worth, Texas, will begin drilling its second well in Hancock County immediately in the Bayou LaCroix area in the NW 1/4 of SE 1/4 of Section 22, Township 8, South Range 15W.

The rigging from the Cuevas Estate, No. 1 well has been moved, and is in the process of being set up in the designated area. It is reported that drilling will begin as soon as possible in the new location, which is about 7 miles north of the Cuevas well.

The Young Company's strike followed the drilling of 13 dry holes in Hancock County and may add considerable importance to a deep production trend.

The well has been testing gas and distillate in the Lower Cretaceous sand from a perforated interval at 10,339-51 ft. The nearest production to the new discovery is about fifty-five miles to the north, where the Pistol Range field is located.

The strike is now in the final stages of completion after the well flowed at the daily rate of 264 barrels of 42 gravity condensate and 2 1/2 million cubic feet of gas. Bottomhole flowing pressure measured 3075 pounds and bottomhole shut-in pressure was 5025 pounds.

At present, it has not been determined by the Mississippi Oil and Gas Board whether the Cuevas No. 1 will be classified as a gas or an oil well.

The discovery has touched off a large scale leasing boom in the southern half of Pearl River, Hancock and Harrison counties. At various times, the whole western half of Hancock County has been under lease since 1935, which was four years before oil was found in Mississippi. Wild caters, actually searched for oil in the county as early as 1902.

The first well drilled in Mississippi was drilled in the vicinity of Clermont Harbor in 1902. A shallow test was made at about 250 feet. This venture was financed by local businessmen.

J. Willis Hughes, independent oilman from Jackson, Miss., also holds considerable leases in the area and is reported to have contributed acreage to Young for drilling the Cuevas Estate well. The venture was a farmout from Sun, which has drilled seven 10,000 foot dry holes in the area since 1951.

The lower Cretaceous find in this county seems to be the continuation of the trend toward deep drilling in the state to explore this section's possibilities.

Scout Troop No. 61 Holds Xmas Party

Brownie Troop No. 61, with Mrs. A. K. Martinovich as leader and Mrs. E. Brown as assistant leader, held a Christmas party at the Girl Scout House during the last meeting before the holidays. The table was beautifully decorated with the Nativity Scene as the centerpiece, and Christmas corsages were given to the girls.

New Year Proclamation

WHEREAS, the holiday season is nearing its close, and WHEREAS, by custom, New Year's Day being the first day of the new year has been universally declared a Holiday, and

WHEREAS, New Year's Day of this year is Sunday, January 1st, 1956,

NOW THEREFORE, BE IT HEREBY PROCLAIMED that the City of Bay Saint Louis shall set aside the period beginning at noon, December 31st, and extending to and including January 2nd, 1956, as holidays and to be observed as such by the business houses of this City, wherever possible.

BE IT FURTHER RESOLVED AND ORDERED that the City Hall and other public buildings close their doors for the aforementioned period.

WITNESSED this 24th day of December A. D. 1955.

John A. Scafile, Mayor.

Don't Be 'Slicked' by a 'Slicker'; Check With Your Attorney Before Signing

The local attorneys have been besieged by calls from people throughout the county who have signed instruments purporting to be oil, gas and mineral leases on their land, and the so-called "lease hounds" have given them 10, 15 and 80-day drafts.

Because of the discovery of oil and gas in Hancock County, the county is full of lease hounds, most of them absolute strangers, who are besieging the people of this county to lease their land. Most of these lease hounds are brokers who are securing leases in their names, giving a check to be paid in the future.

Now, if they are unable to assign the lease they secure, or if they find something wrong with your title, the checks will never be honored and in most cases they are speculating on your mineral rights at your expense.

IT IS USUALLY TOO LATE TO CONTACT YOUR ATTORNEY AFTER YOU HAVE SIGNED THE PAPERS WITH ABSOLUTE STRANGERS.

We are happy over the discovery of oil and gas in our county and we are happy that the people in our county will profit by leasing their land, but don't get "slicked" by a "slicker"; a person unknown to you. Take him to your attorney, whoever he may be, before signing any papers. That is the way to be sure as to what you are signing and when you will secure the money.

This notice is given not to benefit your trusted attorney but to protect you. It is too late to call him after you have signed to a stranger, not knowing what you have signed.

CHANCERY SUMMONS

The State of Mississippi

To AMY E. DAVIS, 345 Ulunui

Street, Kailua, Lanikai Oahu,

Honolulu T. H.

You are summoned to ap-

pear before the Chancery

Court of the County of Hancock,

in said State on the Third Mon-

day of February, A. D. 1956, to

defend the suit No. 7379 in said

Court of ELLIOTT G. DAVIS,

Jr., wherein you are a de-

fendant.

This 13th day of December,

County Agent Notes

BASIC RULES FOR CATTLEMEN

Try at all times to have more grass and feed than cattle. As long as you can do this, you are protected against most emergencies. Cattle provide a way to market farm grown feeds.

If you are in the cow-calf business, develop the best cow herd possible by retaining top producing cows, culling poor ones and saving the best heifers for replacements.

Select your bulls carefully, keeping quality, middle-of-road type and gaining ability in mind when making your selections.

Aim to sell heavy calves. Arrange pasture and roughage supply so as to carry over late calves. Avoid sending late calves to market in fall.

Change your calving program around for fall and winter calves where conditions are favorable and operate on that basis. If cows calve in fall or winter, you can sell heavy slaughter calves in May and June - a much better time to sell than in September. You can also make top-grade feeder calves from August through October, or they can go into your own feed lot or be carried over.

Lightweight calves held over from top-grade herds should be strongly wintered on silage,

then pastured on small grain before going to market in May or June, or before being put on full feed in the early fall. This is the preferred way to handle late calves that have quality.

Study the crop history of these fields, then decide how many bales per acre you want to harvest. Indicate this on your soil sample information sheet. Take your plans over with the county agent.

Be prepared for 1956. Buy your fertilizer needs and move it to the farm for placement in seedbed two to three weeks before planting time. Check over your machinery and have it all in order to work when time comes.

If fields need sub-soiling, do the job when the soil is as dry as possible.

Shred cotton stalks into pieces as short as you can afford. This aids in more rapid decay of diseased cotton stalks and helps to destroy boll weevil winter quarters.

On level sandy to silty soil, leave stalks on top of the ground. On heavy clay soils, turn under by bedding or flat breaking as soon as the soil is dry enough.

Support the cotton industry. Buy and use more cotton during 1956. This will help use up the surplus.

Lower cost production per pound of lint cotton will help you make more net farm income in 1956. Here are a few suggestions to help you produce cheaper cotton.

Select your fields carefully. Plant cotton on land that has a fairly deep, well drained soil. Dig into soil to determine depth of top-soil and any hardpan.

Plant cotton on land that has a fairly deep, well drained soil. Dig into soil to determine depth of top-soil and any hardpan.

Plant cotton on land that has a fairly deep, well drained soil. Dig into soil to determine depth of top-soil and any hardpan.

County Agent Notes

Try at all times to have more grass and feed than cattle. As long as you can do this, you are protected against most emergencies. Cattle provide a way to market farm grown feeds.

If you are in the cow-calf business, develop the best cow herd possible by retaining top producing cows, culling poor ones and saving the best heifers for replacements.

Select your bulls carefully, keeping quality, middle-of-road type and gaining ability in mind when making your selections.

Aim to sell heavy calves. Arrange pasture and roughage supply so as to carry over late calves. Avoid sending late calves to market in fall.

Change your calving program around for fall and winter calves where conditions are favorable and operate on that basis. If cows calve in fall or winter, you can sell heavy slaughter calves in May and June - a much better time to sell than in September. You can also make top-grade feeder calves from August through October, or they can go into your own feed lot or be carried over.

Lightweight calves held over from top-grade herds should be strongly wintered on silage,

then pastured on small grain before going to market in May or June, or before being put on full feed in the early fall. This is the preferred way to handle late calves that have quality.

Study the crop history of these fields, then decide how many bales per acre you want to harvest. Indicate this on your soil sample information sheet. Take your plans over with the county agent.

Be prepared for 1956. Buy your fertilizer needs and move it to the farm for placement in seedbed two to three weeks before planting time. Check over your machinery and have it all in order to work when time comes.

If fields need sub-soiling, do the job when the soil is as dry as possible.

Shred cotton stalks into pieces as short as you can afford. This aids in more rapid decay of diseased cotton stalks and helps to destroy boll weevil winter quarters.

On level sandy to silty soil, leave stalks on top of the ground. On heavy clay soils, turn under by bedding or flat breaking as soon as the soil is dry enough.

Support the cotton industry. Buy and use more cotton during 1956. This will help use up the surplus.

Lower cost production per pound of lint cotton will help you make more net farm income in 1956. Here are a few suggestions to help you produce cheaper cotton.

Select your fields carefully. Plant cotton on land that has a fairly deep, well drained soil. Dig into soil to determine depth of top-soil and any hardpan.
